Crème Prodigieuse® Boost **New-generation of Multi-Corrective** **skincare which boosts youthful skin**

Crème Prodigieuse® Boost has a multi-correcting action on the harmful effects due to the busy lifestyles of 25-39 year-olds (stress, fatigue, etc.) and urban environment on the skin, thanks to an anti-oxidant complex with Jasmine Flower. At your fingertips: **freshness, radiance and youth**; while respecting the natural skin balance.

Floral innovation: a complex of active ingredients to boost the skin's mechanisms

Women aged 25-39 are expert multitaskers, working 48-hour days and getting 200% out of every aspect of their lives. On a daily basis, their skin endures high stress levels, insufficient sleep, along with the effect of the urban environment, such as pollution and various forms of radiation. Bombarded with oxidative stress, cellular stress and collagen damage, the skin reaches the point of burn-out...

NUXE has come to the rescue of skin cells, with an anti-oxidant complex with Jasmine Flower combined with Calendula Flower and a Cellular Sugar, which boost the skin's mechanisms to correct the consequences of this furious pace of life:

Jasmine Flower

NUXE Research has selected a Jasmine Flower Extract, obtained by enzymatic hydrolysis, a green process which is completely eco-friendly. This extract is particularly rich in flavonols with anti-oxidant properties.

A boost for:

The skin's anti-oxidant defence mechanism.

It strengthens its "defence" reserves by boosting Glutathion (+70%)⁽¹⁾ and Catalase (+85%)⁽¹⁾, and neutralises the harmful effects of free radicals.

Calendula Flower

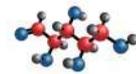

NUXE PATENT (FR)

In addition to their beautiful bright orange colour, Calendula petals are renowned for their high active molecule content (flavonoids, carotenoids, esters, etc.).

A boost for:

The skin's Collagen reserves.

Collagen neosynthesis is promoted and the enzymes which cause the destruction of collagen are inhibited. Its anti-radical action, **equivalent to that of vitamin E**, also helps protect the extracellular matrix. Its **regenerative** and protective effects thus help delay the appearance of the first wrinkles.

Cellular sugar (Ribose)

Ribose is a natural sugar, found in all living cells of our body. It is part of RNA (a molecule which supports protein synthesis) and ATP (a source of energy for cells). NUXE Research chose pure Ribose, obtained from corn using biotechnology.

A boost for:

Cellular activity.

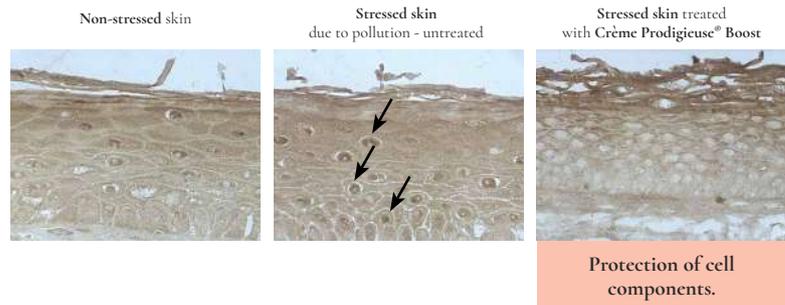

By improving cellular respiration, this sugar supports the main metabolic reactions and limits cell fatigue. The synthesis of cutaneous proteins (elastin and collagen) is promoted, to guarantee firm, supple skin.

(1) *in vitro* test on active ingredient.

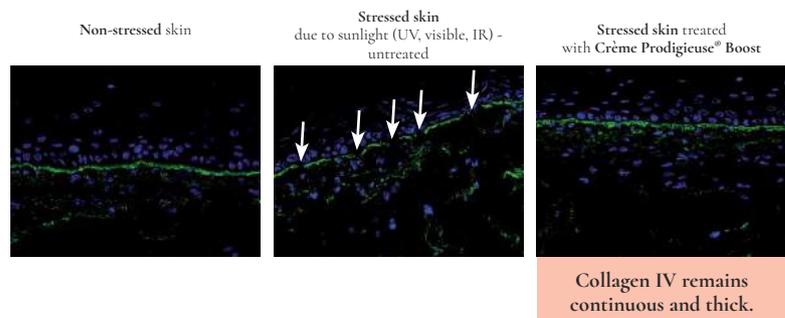

Effectiveness proven by in vitro tests... on skin subjected to stress conditions

Crème Prodigieuse® Boost helps the skin manage
the effects of environmental stress more easily:

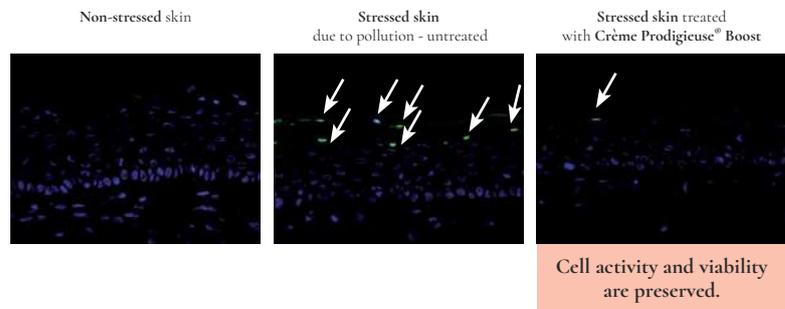

- ANTI-OXIDANT ACTION
Brown staining of Malondialdehyde (MDA)

- ANTI-AGEING ACTION
Fluorescent green staining of Collagen IV

- ACTION ON CELLULAR STRESS
Fluorescent green staining of Apoptosis

Preservation of the skin's natural balance demonstrated by an innovative test on the cutaneous microbiome

For the first time, NUXE worked with an expert clinical centre specialising in microbiology, 29 volunteers Crème Prodigieuse® Boost underwent a **complete analysis of their cutaneous microbiome**: quantitation of the bacterial population, identification of the predominant categories and measurement of skin pH. After 28 days of use, the same measurements were performed and compared with T0, showing that the microbiome had not changed.

Crème Prodigueuse® Boost

The new Multi-Correction skincare range Freshness • Radiance • Youth

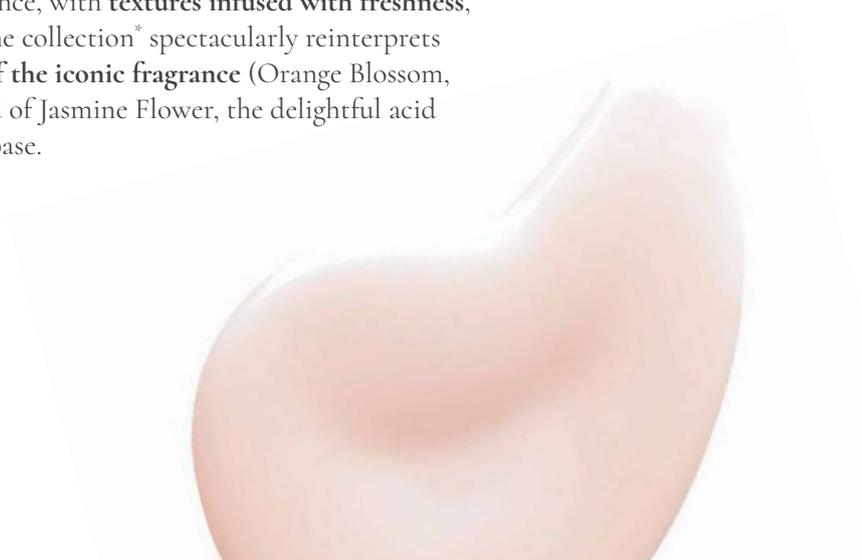

Live life to the full, without worrying about consequences on the skin, such is the promise of this new-generation multi-corrective skincare... **5 skincare products with a “CTRL-Z” effect** to counter the effects of fatigue, stress and pollution on the skin, and keep it fresh, plump and luminous, even when the pace of life speeds up!

A new fresh and subtle sensory identity!

NUXE immerses women in a new sensory experience, with textures infused with freshness, which melt into the skin in the blink of an eye. The collection* spectacularly reinterprets its olfactory signature: rediscover the sensuality of the iconic fragrance (Orange Blossom, Magnolia, Vanilla), lifted with a fresh, lively blend of Jasmine Flower, the delightful acid notes of Pink Lychee and a sensual White Wood base.

*Only the Multi-Correction Eye Gel Balm contains a specific fragrance, suited to this delicate area.

Energising Priming Concentrate

ALL SKIN TYPES

A “booster” infusion

The ideal primer to prepare your skin for day and night skincare, this serum-lotion with its revolutionary texture inspired by Korean liquid cosmetics combines 2 types of natural Hyaluronic Acid. With a complementary action, these offer a visible smoothing effect while moisturising deep down. Vitamin C activates the skin's radiance.

Apply morning and/or evening with the fingertips, tapping lightly on the face, neck and décolleté, before the daily care.

100 ml pump-bottle

Multi-Correction Eye Gel Balm

ALL SKIN TYPES

Brighten the eyes

With its delicate, ultra-refreshing texture, this gel balm diffuses a Botanical Caffeine extract, with anti-dark circle and anti-puffiness properties in the eye contour area, to counter the effects of an insufficient night's sleep in the blink of an eye. Hazelnut Oil, chosen for its lightness, helps strengthen this fragile area.

Apply morning and/or evening.

15 ml pump-tube

Multi-Correction Gel-Cream

NORMAL TO COMBINATION SKIN

Multi-Correction Silky Cream

NORMAL TO DRY SKIN

The daily booster

Combining the Jasmine Flower anti-oxidant complex with the smoothing effect of natural Hyaluronic Acid, this is the daily booster for revived fresh, radiant skin, while softening the first signs of ageing. Available in 2 textures: a gel-cream with an incredibly light matt finish for normal to combination skin, and a velvety silky cream version for normal to dry skin.

Apply every morning to the face, neck and décolleté.

40 ml pump-tube

Night Recovery Oil Balm

ALL SKIN TYPES

The night guard

Wrapped in this ultra-cocooning texture enriched with Macadamia oil, the skin regenerates itself overnight. While the Jasmine Flower anti-oxidant complex maintains the skin's mechanisms, Nopal Flower Extract (the flower of the Prickly Pear) boosts cell renewal, for a luminous complexion and smooth features upon waking.

Apply every evening to the face, neck and décolleté.

50 ml jar

ADORED BY WOMEN!⁽¹⁾

The skin is fully moisturised (for **97%**), smoother and re-plumped (for **83%**), fresher (for **97%**), with a brighter complexion (for **86%**).

(1) Use test, 29 volunteers. Satisfaction % after 28 days of using the Gel-Cream.

About NUXE:

Over a period of 25 years, NUXE, a French brand pioneering in natural-origin cosmetology, founded by Aliza Jabès, has established itself as a benchmark in a sector that it has largely helped to invent: pharma-cosmetics.

NUXE has managed to combine pleasure of use with pharmaceutical network reassurance in exceptional products incorporating sensory appeal, the strength of nature and the efficacy of science (45 patents - FR). NUXE has constructed a universal range of products, some of which have achieved iconic status - Huile Prodigieuse[®], Crème Fraîche[®] de beauté, Rêve de Miel[®] Lip Balm, Nuxellence[®].

The sensory appeal of these products can also be experienced at more than 45 NUXE spas.

Nuxe's commitments

Quality Commitments

- "Made in France" from formulation to production.
- A strict formulation charter: no mineral oils, no parabens, no animal origin ingredients*, etc.
- Routine in vivo tests, performed under dermatological supervision.
- No animal testing in compliance with applicable regulations.

*Except for beehive products

Environmental Protection Commitments

- Botanical active ingredients with controlled geographic traceability, some of which are environmentally responsible.
- An eco-design approach to packaging.
- Easily biodegradable rinse-off products.
- Reduction in waste generation through recycling.

Social Commitments

- Support for efforts to protect bees with the company "Un Toit pour les abeilles" ("A home for bees"), by sponsoring beehives in the Vosges region of France.
- Support for the "1001 Fontaines" project by funding the installation of drinking water production plants in Cambodia.
