October 2018 – For Immediate Release

Connect here, there, everywhere ...

Go Travel introduces the Worldwide USB Charger to charge 4 devices effortlessly.

Don't get weighed down by multiple chargers and adaptors on your next trip, this handy Worldwide USB Charger from global travel accessories leader, Go Travel allows you to charge four USB devices simultaneously for ultimate convenience at home or away. It benefits from a selection of clip-on interchangeable connectors to give you access to power all across the globe. There's no need to carry multiple units that not only take up much-needed space but also precious weight in your hold luggage. You can effortlessly charge four devices together rather than scrambling around the floor to find multiple sockets in your hotel room.

Offering fast and efficient charging in more than 100 countries, the Worldwide USB Charger has an integrated US connection along with three interchangeable plugs to connect you to the UK, EU and Australasia. This lightweight design has a slim profile that will easily fit into tight spaces in a hotel room and takes up little space in your luggage. The interchangeable connector heads ensure that you can minimise luggage by only carrying what you need but you always have options available for any trip.

Effortlessly charge 4 devices at once thanks to the powerful 4.8A auto-regulating power output, allowing you to charge each device at its optimal speed. This Worldwide USB Charger offers two high-speed 2.4A outputs and two 1A options, perfect to efficiently and quickly charge smartphones, tablets and other power-hungry devices. The auto-regulating design balances the power output so that each device benefits from consistent charging voltage for fast and efficient concurrent charging.

High-quality clip-on plug heads gently glide on to the main unit and reassuringly click into place for a reliable and safe connection first time. Premium circuitry combines with high-quality casing to offer a superior charger that is also fully certified to the latest standards to protect you and your expensive and much-loved devices.

To view the market-leading Go Travel charger collection visit TFWA World Exhibition & Conference, stand B24, the Yellow Village. To arrange an appointment contact olivia@go.travel.

Company Information

Established in 1978, Go Travel is the market leader for travel accessories, offering the most widely distributed range worldwide. Still a UK family business, it is just as committed to bringing innovative products to market as it was when it began 40 years ago.

What is not commonly known is that the company pioneered the concept of a co-ordinated range of travel accessories and its success has spawned an entire global industry which it still dominates to this day.

In the beginning there were just 10 products in the collection. Today, Go Travel offers over 300 accessories, designed in-house at its London headquarters. The product range can be found in over 12,000 retail locations across the UK and is stocked in over 100 countries globally. With millions of units sold each year, Go Travel has an outstanding reputation for quality, innovation and reliability bringing new and exciting products to market every year.

Go Travel is a brand name of parent company, Design Go Ltd.
